---

Hi Greg,

Your application for a new residence and septic system has been received and is under review. The application is being returned as incomplete for the following reasons:

- Please submit a design for the new system.
- The size of your lot does allow for two residence structures, however the secondary/guest structure exceeds the maximum 15 foot structure height as stated previously. To permit the new structure, you would have to subdivide the parcel with one structure per lot. Our records show the parcel was approved for a lot split in November, 2016 under permit#42499. However, it was never recorded to finalize the lot split. Therefore, you would need to re-apply for the lot split since the permit has expired.

Please let me know what your plans are moving forward and if you have any questions.

Thank you,

Shannon Westerlund
