Application# 2019-004858

Hi Dorothy,

Your photos have been received and attached to your application. Due to size of the building and the location zoned Shoreland, a current compliance inspection on the septic system is needed for the permit. I've attached a list of inspectors in the area for your use.

Please also include the existing building and impervious surface calculations of the property. You will need to verify that the building coverage is under 15% and the impervious coverage is under 25% of the lot area. See definitions or coverage below. If you have questions please let me know or call 218-927-7342

Building Coverage. "Building Coverage" means the ground surface covered by any building or appurtenance, including, but not limited to, decks, overhangs and projections therefrom, outdoor furnaces, fish houses, sheds, carports, lean-to's, or any similar building. Building coverage does not include eaves of twenty-four (24) inches or less.

Impervious surface coverage. "Impervious surface coverage" means any structure, facility or surface that sheds water including structures and facilities, sewage treatment system absorption areas (equal to 190 sq.ft./bedroom), retaining walls, and roadway surfaces and parking areas.

Impervious surface coverage does not include eaves of twenty-four (24) inches and less.

Thank you,

Shannon Westerlund
