

520 Lafayette Road North St. Paul, MN 55155-4194

Compliance Inspection Form

Existing Subsurface Sewage Treatment Systems (SSTS)

Doc Type: Compliance and Enforcement

Inspection results based on Minnesota Pollution Control Agency (MPCA) requirements and attached forms – additional local requirements may also apply. Submit completed form to Local Unit of Government (LUG) and system owner within 15 days	For local tracking purposes:							
System Status								
System status on date (mm/dd/yyyy):11/30/2012								
 ✓ Compliant – Certificate of Compliance (Valid for 3 years from report date, unless shorter time frame outlined in Local Ordinance.) ✓ Noncompliant – Notice of Noncompliance (See Upgrade Requirements on page 3.) 								
Reason(s) for noncompliance (check all applicable) Impact on Public Health (Compliance Component #1) – Imminent threat to public health and safety Other Compliance Conditions (Compliance Component #3) – Imminent threat to public health and safety Tank Integrity (Compliance Component #2) – Failing to protect groundwater Other Compliance Conditions (Compliance Component #3) – Failing to protect groundwater Soil Separation (Compliance Component #4) – Failing to protect groundwater Operating permit/monitoring plan requirements (Compliance Component #5) – Noncompliant

4. Soil Separation - Compliance component #4 of 5							
Date of installation: 7/28/1992 (mm/dd/yyyy)	Unknown	Verification method(s):					
Shoreland/Welihead protection/Food beverage		Soil observation does not expire. Previous soil observations by two independent parties are sufficient, unless site conditions have been altered or local					
Compliance criteria:		requirements differ.					
For systems built prior to April 1, 1996, and not located in Shoreland or Wellhead Protection Area or not serving a food,	Yes No	 ☑ Conducted soil observation(s) (Attach boring logs) ☐ Two previous verifications (Attach boring logs) 					
beverage or lodging establishment:		☐ Not applicable (Holding tank(s), no drainfield)					
Drainfield has at least a two-foot vertical		☐ Unable to verify (See Comments/Explanation)					
separation distance from periodically saturated soil or bedrock.		Other (See Comments/Explanation)					
Non-performance systems built April 1, 1996, or later or for non-performance systems located in Shoreland or Wellhead Protection Areas or serving a food, beverage, or lodging establishment:	⊠ Yes □ No	Comments/Explanation:					
Drainfield has a three-foot vertical separation distance from periodically saturated soil or bedrock.*							
"Experimental", "Other", or "Performance"	☐ Yes ☐ No	Indicate depths or elevations					
systems built under pre-2008 Rules; Type IV or V systems built under 2008 Rules (7080. 2350 or 7080.2400 (Advanced Inspector		A. Bottom of distribution media 39"		39"			
License required)		B. Per	iodically saturated soil/bedrock	75"			
Drainfield meets the designed vertical separation distance from periodically		C. Sys	stem separation	36"			
saturated soil or bedrock.		D. Rec	quired compliance separation*	36"			
Any "no" answer above indicates the system is failing to protect groundwater. *May be reduced up to 15 percent if allowed by Local Ordinance.							
Operating Permit and Nitrogen	BMP* - Complian	ce con	ponent #5 of 5 🛛 🔯	Not applicable			
Is the system operated under an Operating	Permit?	☐ No	if "yes", A below is requi	red			
Is the system required to employ a Nitroger	n BMP?	☐ No	If "yes", B below is requi	red			
BMP = Best Management Practice(s) s	specified in the system (design					
If the answer to both questions is "no", this section does not need to be completed.							
Compliance criteria							
a. Operating Permit number: Have the Operating Permit requirements been met? b. Is the required nitrogen BMP in place and properly functioning?							
			☐ Yes ☐ No				
		g?	☐ Yes ☐ No				
Any "no" answer indicates Noncompliance.							
Upgrade Requirements (Minn. Stat. § 115.55) An imminent threat to public health and safety (ITPHS) must be upgraded, replaced, or its use discontinued within ten months of receipt of this notice or within a shorter period if required by local ordinance. If the system is failing to protect ground water, the system must be upgraded, replaced, or its use discontinued within the time required by local ordinance. If an existing system is not failing as defined in law, and has at least two feet of design soil separation, then the system need not be upgraded, replaced, or its use discontinued, notwithstanding any local ordinance that is more strict. This provision does not apply to systems in shoreland areas, Wellhead Protection Areas, or those used in connection with food, beverage, and lodging establishments as defined in law.
