Re: 49803 197th Ave- McGregor, MN – Foundation and Tank Interaction Review
NCE Job No.: 21-018

Dear Greg

At your request, we have reviewed the attached sketch regarding the interaction of the proposed tank and the proposed new garage foundation.

Provided that this sketch is accurate, in our opinion, neither the tank nor the proposed building foundation will be affected by the condition (see attached sketch). Therefore in our professional opinion we see no adverse effects structurally.

Respectfully,

Jon, E. Aamodt PE
Principal Partner

Professional Certification:

I hereby certify that this plan, specification or report was prepared by me or under my direct supervision and that I am a duly Licensed Professional Engineer under the laws of the State of Minnesota.
