

10x12 Patio
placement will be on
top of hill.

Existing slope conditions.

White Pine (in picture) is stabilizing the slope. Recommend it to remain in place to prevent further erosion.

Proposed retaining wall will be at the base of the slope and rock will be installed above it to stabilize the slope, along with native shrubs/plants.

Vegetation is helping stabilize this slope. Recommend preserving as much natural vegetation as possible.

Retaining wall to be installed at the base and rock and native shrubs/plants will be added above it to prevent further erosion.
