Attachments: Flow Readings Table.docx

Hi Laurie,

Thanks for getting back to me so quickly. While using it as a holding tank, an alarm needs to be hooked up if there is not one already. When you do hook it up to the Drainfield you will need to:

1. Have the pump hooked up to power .
2. Install an event counter to monitor the flow. The event counter will need to be calibrated upon installation. Give Tim at Timber Lakes Septic a call and he can help you with these services.
3. Once the event counter is installed, you will need to record the event counter readings once a month or when present. This is to monitor the amount of water going into the system. Attached is a flow monitoring form to keep track of readings and report to our office when the operating permit is due for renewal.
4. Please notify me when the system is fully hooked up and I will reactivate your operating permit.

If you have any questions please reach out.

Thank you,

Shannon Wiebusch

Hi Shannon,
I am planning to have it hooked up this summer when I build my garage until then I plan to use it as a holding tank.
Is there anything I need to do when I do get it hooked up?

Hi Laurie,

I haven't heard back from you regarding the items needed for the use of your septic system. Please let me know your plans, whether you want to continue using it as holding tank or if you will be hooking up to the Drainfield. If you have any questions or need clarification please contact me at 218-927-7381 or by email.

Thank you,

Shannon Wiebusch

Hi Laurie,

One last thing I forgot to mention is an alarm needs to be installed on the holding tank as long as you continue to use just the holding tank so it alarms you when it's full. Timber Lakes or any septic maintainer can install one.

Thank you,

Shannon Wiebusch

Hi Laurie

Thanks for sending the report from Tim. After reading his report it looks like you are just using the holding tank and you don't have a pump or counter installed yet to use the mound. In that case the operating permit will be on pause until you are fully hooked up and using the mound. Let me know when that happens and until then you don't have to do anything with renewing this operating permit.

To continue using just the holding tank we should have from you a pumping agreement from your pumper. Timber Lakes has the form if they are the ones doing your pumping you can contact them for it.

If you have any questions please let me know.

Thank you,

Shannon Wiebusch

Hi Shannon,

I got the letter about my operating permit for my septic. I am forwarding you the report I got from Tim at Timber Lake Septic.

I guess I failed to send you a check is that correct?

Please let me and I will send you the money

Thank you

Laurie Gunstrom

Hi Laurie,

Please see attached for the compliance report for your property. I have also sent a copy to Aitkin County. I will send invoices to your home address. At this time Operating permit 698 will stay in effect until the system is fully operational (Electric and event counter). At that time we can get the counter readings and propose the operating permit is not needed.

Thanks!
