This management plan will identify the operation and maintenance activities necessary to ensure long-term performance of your septic system. Some of these activities must be performed by you, the homeowner. Other tasks must be performed by a licensed septic service provider.			
,	,,	em needs to be checked 12 months.	
(State requirements are based on MN Rules Chapter 7080.2450, Subp. 2			
Homeowner Management Tasks	. u 3)		
Leaks – Check (look, listen) for leaks in toi Surfacing sewage – Regularly check for we Effluent filter – Inspect and clean twice a y Owner> Alarms – Alarm signals when there is a pro Owner> Event counter or water meter – Record yo	et or spongy soil around you vear or more. oblem. Contact a service pro	ir soil treatment area.	
-recommend meter readings be of		LY WEEKLY MONTHLY)	
Professional Management Tasks			
Check to make sure tank is not lead	aking		
\Box Check and clean the in-tank effluent filter			
Check the sludge/scum layer levels in all septic tanks			
Recommend if tank should be pumped			
Check inlet and outlet baffles			
Check the drainfield effluent levels in the rock layer			
Check the pump and alarm system functions			
Check wiring for corrosion and function			
☐ Check dissolved oxygen and effluent temperature in tank			
Provide homeowner with list of results and any action to be taken			
☐ Flush and clean laterals if cleanou	ts exist		
"I understand it is my responsibility to properly operate and ma Management Plan. If requirements in the Management Plan are necessary corrective actions. If I have a new system, I agree to a system."	e not met, I will promptly notify	the permitting authority and take
