Terms

Septic Permit General Terms & Conditions

All appropriate permit fees must be paid in full prior to review of the application. Permit fees are non-refundable after a permit is approved.

The septic installer shall notify Aitkin County Environmental Services a minimum of twenty-four (24) hours before the covering of any portion of the septic installation. Changes from the approved septic design will require approval by the County prior to construction. It shall be a violation of the Aitkin County Zoning Ordinance to commence construction before the permit application is approved by Aitkin County.

Property lines, septic sites, wells, and road right-of-ways must be clearly defined with flags, ribbon, or lathe prior to onsite inspection by Aitkin County.

SSTS Permits are valid for one (1) year (unless the permit is to upgrade an Imminent Threat to Public Health & Safety, which is then valid for ten (10) months).

The landowner or authorized agent may make application for a zoning permit agreeing to do such work in accordance with all Aitkin County Ordinances. The landowner or authorized agent agrees that the application, site plan, and all other attachments submitted herewith are true and accurate and shall become a part of the permit. The landowner or authorized agent agrees that, in making application for a zoning permit, the landowner grants permission to Aitkin County, at reasonable times, to enter the property to determine compliance of the application with applicable Local, County or State Ordinances or Statutes. It is the applicants sole responsibility to contact other Local, County or State agencies to ensure the applicant has complied with all relevant Local, County or State Ordinances or Statutes.

After a complete application is submitted and reviewed, an on-site inspection may be conducted; a permit may be issued describing the proposed construction that may take place on the property. Changes to a project may require a permit application to be resubmitted.

Applicants are responsible for getting all applicable entrance permits from the appropriate road authority.

Applicants acknowledge that they are in compliance with MN Contractor Licensing laws per MN Statute 326B.85.

Applicant acknowledges that by submitting this application, the application and its attachments are public information.

Invoice #60729 (06/05/2024)
