GENERAL WORK PERMIT

BUILDING PERMIT PROCESS

Rv

1. Request applicable rules, applications and specifications from Sherwood Forest office.
2. Submit completed application to Sherwood Forest.
3. Sherwood Forest will review and approve (or disapprove) and will sign off on application IF APPROVED.
4. Applicant will then apply to Aitkin County for county permit.

To contact Aitkin County for the required permit forms: Phone 218-927-7342

(or you may visit their website at www.co.Aitkin.mn.us)

You may mail Aitkin County permit request to Aitkin County at:

Aitkin County Environmental Services

209 Second St. NW Room 100

Aitkin, MN 56431

BOTH PERMITS MUST BE DISPLAYED ON THE LOT WHILE WORK IS IN PROGRESS

NAME Philip Gerlach.....TOWN B.....BLK 3.....LOT 21

7. All fencing on a campsite must be 80% open and have a maximum height of 36 inches. The outside construction of fences shall be of natural wood or earth tone colors, as described elsewhere in these Rules. The **only exception** will be landscaping trellis used for flowers and or vines.
8. All roofs must be covered with felt and asphalt or fiberglass shingles or manufactured steel in earth tone colors.
9. All electrical wiring on the campsite requires a permit and inspection of the finished work by Aitkin County.
10. Leak proof holding tanks must be commercially constructed, association approved, high impact plastic, concrete or stainless steel. Capacity is not to exceed 512 gallons per tank per lot. An Aitkin County permit is required for a concrete in the ground holding tank. Check with installer.
11. Deck awnings must be either a custom made retractable canvas awning attached to the RV or be constructed of approved materials. A wood awning with asphalt, fiberglass or manufactured metal shingled roof in earth tone colors (shades of green, brown or tan) may be constructed over your deck. It may extend over the recreational vehicle to a maximum of four (4) feet above the RV, **not the air conditioner unit**. It can then extend up to four (4) feet beyond the opposite primary wall of the RV. **Not four (4) feet beyond the slide out wall**. It cannot extend into the required setback and cannot extend more than one (1) foot beyond the front or back wall of the RV. Color and construction must comply with previously stated building codes. * Measurements must be made from the edge of the finished eaves.
12. Culverts must be large enough to maintain water flow through the ditch, but should be at least eight (8) inches in diameter. **It is the property owners responsibility to keep the culvert open to allow unrestricted flow.**

I have read and understand the above guidelines, restrictions, specifications and setback requirements. I further agree to RE DO the structure if it does not conform to these specifications. I hereby consent to a representative of Sherwood Forest Owners Association to inspect the building before, during and/or after completion.
